Raw material

Ingredients

Alcohol, sugar, extracts and distillates of aromatic plants

Ageing

–

Serving temperature

18°C or with ice

Obtained thanks to the skill of expert extractors of plant aromas. Together with them we formulated a balanced recipe for an extremely pleasant and intense liqueur, of excellent quality as are all our products.

It results from the infusion and distillation of about 20 plant essences extracted from fruits, flowers and roots.

Drink it straight to capture each of the twenty essences from which it is created. Chilled to appreciate its precise and intense composition.

Not just a simple digestif, but it is an extremely refined bitter, a precise infusion and distillation of flavours from fruits, flowers and roots.

Sizes and packaging

70cl
